

## **KEBA AG supports Higher Technical College**

### **100 displays are offered free-of-charge for training purposes to HTL Leonding and HTL Paul Hahn in Linz.**

On May 17th the Higher Technical Colleges in Leonding as well as the HTL Paul Hahn in Linz each received 50 displays for educational purposes from KEBA AG.

The displays are made available to the colleges' students for laboratory exercises as well as for their final thesis papers. KEBA thereby wishes to support not only the technical training centers in Upper Austria but once again intensifies long-standing contacts with its partners.

This act is part of a whole series of activities, which KEBA makes regularly on a yearly basis. Around 40 professional internships are offered for the students of the Higher Technical Colleges whilst KEBA also maintains partnerships with numerous schools and actively engages as exhibitor in countless company fairs held at schools. The purpose of these is both to present KEBA as attractive employer to the students and the teaching staff as well as to provide insight into the practical work of the company.

KEBA has a great demand for well trained HTL-technicians. Every year between five to eight HTL-graduates enter into employment with KEBA.
